

Amendments to the Claims

Claims 1-5 (canceled)

Claim 6 (new): A network printer connected to a network for printing a document in the Internet by a user, comprising:

- a keypad unit for inputting a number from the user;
- first retrieve means for sending said inputted number via Internet to a first server, which translates said number into the information of receiving a document from a second server via Internet and sends said information to said printer, and for receiving said information;
- second retrieve means for, according to said received information, retrieving said document from said second server via Internet;
- print means for printing said received document.

Claim 7 (new): The network printer as claimed in claim 6, said information of receiving a document from a second server via Internet is at URL format.

Claim 8 (new): The network printer as claimed in claim 6, wherein said information of receiving a document from a second server via Internet further includes the title of said document, and said network printer further comprising:

- a display unit for displaying the title of said document, and prompting the user for confirmation before printing said document.
